GETTING STARTED

We realize that trying to find the perfect setup in today's world is a daunting task. The guide below is what we feel is the best combination of our gear for specific tasks. Cost is a very important factor for many, so we will rank the setups in "good", "better," and "best" to do our best to incorporate all budgets.

Please note, this is all based on personal preference on behalf of the company. What we feel is the ideal Cranking setup may vary from your own opinion!

For Spinning reels, suggested size will be listed in place of ratio.
